Art Unit: 1615

#### **DETAILED ACTION**

Examiner acknowledges receipt of application filed 09/04/03.

#### Priority

Examiner acknowledges the claim to subject matter of prior Application Numbers: 10/137,236; 09/405,024; and 09/163,038.

### Information Disclosure Statement

1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the examiner on form PTO-892 has cited the references, they have not been considered.

## Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the first paragraph of 35 U.S.C. 112:
  - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 3. Claims 1 and 3 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for treating restenosis or coronary artery disease, does not reasonably provide enablement for preventing restenosis or coronary artery disease. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims.

The asserted utility is not believable on its face. It is not known how a method wherein a composition is claimed can be administered to prevent restenosis or coronary artery disease. It

Art Unit: 1615

is not known how the occurrence of a pending restenosis or coronary artery disease can be precisely predicted in a subject as to when and how the condition will occur and to administer the claimed composition to prevent the occurrence.

For rejections under 35 U.S.C. 112, first paragraph, the following factors must be considered (In re Wands, 8 USPQ2d 1400, 1404 (CAFC, 1988):

- 1) Breadth of claims.
- 2) Nature of invention.
- 3) State of prior art.
- 4) Level of ordinary skill in the art.
- 5) Level of predictability in the art.
- 6) Amount of direction and guidance provided by the inventor.
- 7) Existence of working examples
- 8) Quantity of experimentation needed to make or use the invention based on the content of the disclosure.

The present invention is in the field of treating restenosis or coronary artery disease with NO-releasing medical implant/device. The state of the art is what prior art knows about the invention. There is no known art wherein a certain composition is administered to successfully prevent restenosis or coronary artery disease before the occurrence.

The level of ordinary skill is high but only in the art of treating restenosis or coronary artery disease. The predictability or lack thereof in the art refers to the ability of one skilled in the art to extrapolate the disclosed or known results to the claimed invention. The lower the predictability, the higher the direction and guidance that must be provided by the applicants. In

Art Unit: 1615

the instant invention the predictability is very low and consequently, the need for the higher levels of direction and guidance by the applicants. However, the amount of direction and guidance provided by the applicants is limited to treatment. There is no evidence in the specification that established correlation between the experiment and the claimed utility. See Exparte Mass, 9 USPQ2d 1746, 1987. The quantity of experimentation required to use the method as claimed in the instant invention, based on applicants' disclosure would be undue burden because, one of ordinary skill in the art would have to perform significant amount of in-vivo experiments as well as assays.

#### Double Patenting

4. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101, which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer <u>cannot</u> overcome a double patenting rejection based upon 35 U.S.C. 101.

- 5. Claims 1-15 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-15 of prior U.S. Patent No. 6,379,691. This is a double patenting rejection.
- 6. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicants' cooperation is requested in correcting any errors of which applicants may become aware in the specification.
